● Children (0-5) ● Youth (5-17) ● Adult (18+)

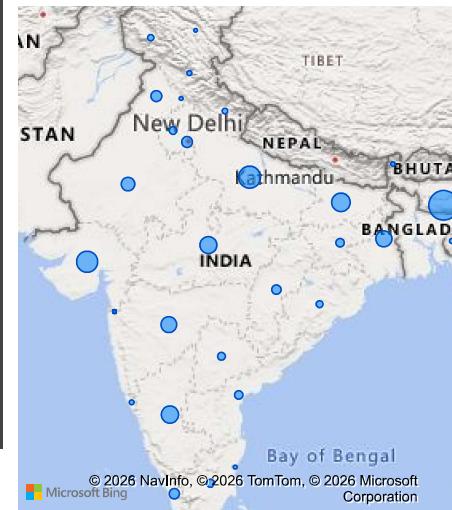

"Aadhaar Enrolment by Age by Group (%)"

Key Insights

- Adult Aadhaar enrolment dominates across most Indian states, indicating higher identification coverage among the 18+ population.
- Youth (5-17) enrolment shows moderate penetration, suggesting scope for increased outreach in schools and rural areas.
- Child (0-5) enrolment remains comparatively low, highlighting the need for early-age registration drives.
- Meghalaya and Assam display strong enrolment activity compared to other regions.
